

QUALITY POLICY

BLE Lighting and Power Ltd are specialist manufacturers and suppliers of Emergency Lighting Equipment, Static Inverters, Central Battery Units and Emergency Lighting Control Systems primarily in the UK.

BLE Lighting & Power's electrical solutions preserve life safety for our customers and their facilities.

The company also manufactures and distributes condensate sensing and pumping equipment under the Hydron brand.

The company is committed to the supply, installation, and commissioning of such systems, equipment, and related services to the highest possible standards.

BLE Lighting and Power Ltd recognises that the maintenance of quality standards in all activities is the key to our success and reputation. The company is therefore committed to a policy to provide a service which fulfils the requirements and expectations of our customers in all ways and, where necessary, meets regulatory requirements.

To achieve this commitment, a documented quality management system which meets the requirements of BS EN ISO 9001: 2015 has been established in which the Managing Director is responsible for determining measurable objectives for customer satisfaction and the aspirations of the company.

The company aims to ensure:

- *That processes are in place and focused on.*
- *That trained and competent personnel are always available focusing on customers' needs and expectations.*
- *That a high quality of service is given providing optimum value to the customer commensurate with cost.*
- *There is a consistent approach towards public and customer safety.*
- *That legislative and regulatory requirements are always complied with.*
- *That processes are performed in a cost-effective manner.*

The system operates from the receipt of an enquiry to completion of the project involving a series of processes which are operated within the business. Appropriate indicators of performance of processes are used to identify potential improvements in the company's capability and capacity.

The processes and practices are described in a Quality Manual together with other documents which are adhered to by all employees. Objective evidence is provided to demonstrate that the system is maintained and that the processes are being effectively operated.

The company continually improves the effectiveness of the quality management system, and the objectives are appraised at management reviews at which this policy is examined for continued suitability.

All employees are made aware of this policy and its objectives and are committed to its implementation.

The system is maintained by ongoing verification activities together with appropriate training and education of those involved and the overall improvements sought are monitored as part of the regular management review of the system.
